

About YM Predictions

Your Markets. Your Odds.

What Is a Prediction Market?

A prediction market is a platform where people trade on the outcome of real-world events, not by picking winners for fun, but by putting real money behind their informed opinion. Think of it like a stock market, except instead of trading company shares, you're trading on questions: „Will Bayern Munich win the Champions League?“ „Will NASA confirm the existence of Aliens by the end of 2026?“ „Will Drakes new Album „Iceman“ be number one on Billboards in July?“

Every market resolves as a simple Yes or No. You buy a Yes contract if you believe the outcome is Yes, and buy a No contract if you believe the outcome is No. The price, expressed as a percentage between 0% and 100%, reflects the collective wisdom of everyone trading. That number isn't set by a bookie or an algorithm. It's the live consensus of the users.

What makes prediction markets uniquely powerful is that they **aggregate information**. When you have skin in the game, you think harder, research more, and factor in everything you know. In simple terms "Put Your Money where Your Mouth is". The resulting price is often a more accurate prediction than any single expert's forecast.

How It Works

YM Predictions is a peer-to-peer platform, you're not betting against us, you're trading with other users. Here's the logic in three steps:

- **A market opens:** for example: Will Spain win Euro 2028? YM defines clear resolution rules and the official source that will determine the outcome.
- **You trade:** buy Yes if you believe it'll happen, buy No if you don't. Prices shift in real time as more people trade. You can also sell your position before the event resolves to lock in profits or cut losses.
- **The market settles:** once the real-world outcome is confirmed, contracts pay out. Yes holders win if it happened; No holders win if it didn't. No house edge. No hidden margin. Just peer-to-peer pricing.

Our Journey — Where We're Headed

We're not waiting until everything is perfect. We're launching in stages, starting now, during the biggest sporting events in the world.

Summer 2026 — Demo Launch (Win Real Money)

We're kicking things off with a demo launch tied to the 2026 FIFA World Cup, the single largest sports event on the planet. This isn't just a teaser. **Real money is on the table.**

During the World Cup, you'll be able to join our waitlist, sign up early, and trade on match outcomes across the tournament. Every prediction is live. Every contract is real. This phase is designed to prove the product, build our community, and let you experience exactly what peer-to-peer prediction trading feels like before the full platform goes live.

- Trade on group stages, live matches, futures and entertainment markets
- Win real money based on where the market moves
- Get first access when the full platform launches
- Join the community of early traders shaping Europe's prediction market

October 2026 — Full Platform Launch

This is where the real show begins. In October, YM Predictions goes live as one of Europe's first fully regulated prediction market platform. The World Cup launch was the warm-up, the October launch is the full product.

We're opening up markets across various categories, covering virtually every domain where real-world outcomes can be objectively verified:

- **Sports** — Football, F1, tennis and more. Match outcomes, player milestones, transfers, season-long markets.
- **Elections** — National elections, party results, next Bundeskanzler, EU parliamentary outcomes.
- **Pop Culture & Awards** — Film awards, Best Picture, music charts, Youtube views, viral moments.
- **Corporate & Business** — IPOs (e.g. SpaceX), earnings beats, CEO changes, deal signings.
- **Technology & Products** — AI model releases, hardware launches, next frontier model, Vision Pro successors.
- **Science & Space** — Space launches, ESA/NASA mission milestones, Starship orbital success, Alien sightings
- **Policy Outcomes** — EU legislation, MiCA II passage, national laws like German speed-limit reforms.
- **Daily / Weather** — Short-horizon markets: temperature records, weather events, daily outcomes.

- **Geopolitics** — International agreements, diplomatic deals, treaty signings and peace negotiations.
- **Public Figure & Personal** — Career moves, endorsements, next Twitter/X CEO, public appointments.

Why YM Predictions?

There are plenty of ways to bet in Europe. YM isn't a bookmaker and that distinction matters more than you might think.

- **No house edge.** Traditional sportsbooks build a margin into every odds line. On YM, there's no operator taking a cut of your loss. We charge a small transaction fee on executed trades — and that's it — fully transparent, fair.
- **Real market prices.** The 67% you see isn't an odds conversion from a bookmaker's model. It's what the crowd believes.
- **Exit any time.** Don't want to wait until the final whistle? Sell your position mid-market, at any point before resolution. Lock in profits. Minimise losses. Trade dynamically, not passively.
- **Fully regulated.** EU-licensed, EUR-native and built with full KYC and AML compliance. You're protected. Your funds are protected.
- **Beyond sports.** If you have a view on the world, not just the weekend fixtures, YM gives you the marketplace to price it.

Be Part of Something New

Join the waitlist. Trade during the World Cup. Be one of the first to experience what it means when the market is yours.

Your Markets. Your Odds.
